

Dear Abu Dhabi Resident, Owner, Investor,

FixPro is a 100% local company, based in Abu Dhabi, focusing on improving your **Indoor Air Quality** for both the private and the commercial sector.

Abu Dhabi will now be able to breathe easier with the arrival of the **area's first HydroKleen licensee**, a world-leading air conditioning cleaning service from Australia.

HydroKleen Global provides a unique system that flushes **split systems of harmful bacteria, saving on running costs and reducing the levels of airborne contaminants.**

Established in Australia in 2009 and now in over 22 countries, HydroKleen has established an international benchmark for cleaning and sanitizing ductless air conditioning systems cost effectively and time efficiently.

FixPro says there are three very simple reasons why split systems air conditioners need to be regularly cleaned and sanitized:

- 1) air conditioners become **dirty** and **moldy**, creating a potential **health hazard, recirculating dirty air in the room**, and dirty air in means dirtier air out.
- 2) a dirty air conditioner will use up to **30% more power** than a clean one, so it's also a real financial cost.
- 3) and one that most people don't realize, is **a clean air conditioner will last longer** as the dirtier they get the harder they work to keep you cool – and the harder it works the quicker it will wear out.

FixPro's cleaning process is so thorough it's been exclusively approved by **Australia's National Asthma Council's Sensitive Choice Program.**

The trademark-designed system effectively tackles and addresses the reasons why people should keep their air conditioner clean, providing healthier air, lower power bills and a longer unit life.

We focus on:

- **Eliminating a range of contaminants**
- **Significantly improving indoor air quality**
- **Reduce power consumption**

We provide:

- **A FREE Assessment & Consultation**
- **HVAC System Cleaning & Sanitization**

We use **Chemical-free Cleaning Agent** “Nu-Kleen Smell” which is a concentrated biotechnological all. It leaves an active and long-lasting bacterial flora that continues to eliminate odors at the source after the cleaning procedure. In simple terms we use **GOOD BACTERIA** to help take over the bad bacteria with a longer lasting effect than the commercial, chemical infused products.

List of sectors covered by our services:

- Residential Villas
- Apartments
- Industrial Workshops
- Restaurants
- Mosques
- Catering Facilities
- Labor Camps

Service Guarantee

1. We **Guarantee** in the highly unlikely event that you don't believe it is the most thorough clean your air conditioner has ever had, the clean is FREE and we will book and pay for your air conditioner to be cleaned by a competitor!
2. We **Guarantee** you will be treated courteously and professionally at all times, just like we'd treat members of our immediate families.
3. We **Guarantee** you will receive prompt and efficient service and our FixPro technicians will always be on time (or you will receive a courtesy call explaining why) and be appropriately dressed.
4. We **Guarantee** you will have everything fully explained to you and we will always take the time to do so in terms which are easy for you to understand.
5. We **Guarantee** the airflow of your air conditioner will improve.
6. We **Guarantee** after your air conditioner has been "HydroKleened" it will lower the temperature more quickly by 10-15%.
7. We **Guarantee** your home or office will be left clean and tidy.
8. We **Guarantee** your air conditioner will not leak after it has been "HydroKleened" if we caused it, we'll fix it.
